EXPERIENCE

Svitla Systems, Inc. — Senior Test Automation Engineer

April 2025 – Present

Maintaining and extending the Playwright/GraphQL UI and API test automation suite on GitHub Actions, while working across the AWS infrastructure (DynamoDB, CloudWatch, Lambdas, S3). Using AI tools (Copilot) in daily work, clarifying requirements, testing new features and improvements, and accepting them for release. Collaborating with multi-location teams using Kanban and Scrum. Tech stack: Playwright, TypeScript, GraphQL, AWS, Copilot, Postman, Qase, Snyk.

USQB — Board Member, Lead Expert

February 2015 – Present

Own the process of reviewing Software Testing courses to certify them as Accredited by ISTQB — establishing and maintaining the acceptance criteria for the courses, owning the terms and conditions of reviews, and forming and leading the team of reviewers that carries them out.

N-iX — Lead Test Automation Engineer

July 2020 – March 2025

Created and executed a comprehensive test automation roadmap based on product risks, business priorities, technical feasibility, and ROI. Automated testing of mobile apps (iOS, Android), enhancing and expanding the automation testing framework. Automated testing of a microservice-based web app, setting up test automation and CI from scratch, covering UI and API testing/mocking (REST, gRPC, websocket/socketIO) plus visual testing, and mentored test automation engineers, fostering a culture of learning and innovation within the team.

Tech stack: TypeScript, Playwright, Detox, Appium/WDIO, React Native, Jest, Mocha, Mockserver, GitLab CI, GitHub Actions, Docker, BrowserStack, Sonarqube.

Ciklum — QA Lead

February 2012 – June 2020

Introduced the QA function to the customer's company and led and coordinated QA efforts. Delivered hands-on testing across GUI level (Web GUI of a SaaS, iOS app), technical testing (API, DB, patches, log analysis, integrations with *aaS), automated testing (Nightwatch.js, Cypress, Selenium/C#), and performance testing (JMeter).

Ciklum – Test Team Lead

July 2010 – May 2012

Led a group of 7 experienced testers who participated in or managed testing across different SCRUM teams. Drove innovation in test process and techniques – ACC modeling, pairwise testing, structural exploratory testing, and breaking the software – and exercised high-level test control, using statistics and metrics to identify and track problems. Participated in and managed testing of MS Office add-ins and web applications, and handled mentoring, coaching, and people management.

Tools: MS TFS, MS Test and Lab Manager, MS Hyper-V, MS DWH with Excel/Pivot tables, MS Office, MS SharePoint.

Infopulse – Sr. Test Engineer

June 2007 – July 2010

Part of the team working for a Danish software development company that develops and maintains the Integrated Record and Document Management System (IRDMS), using OpenUP/Basic. Responsible for developing test plans and test cases, developing scripts for automated testing, testing and reporting results, conducting QA reviews of work products, developing environment/procedure/end-user documentation using the Information Mapping method, tailoring process documentation to the team and project needs, and clarifying requirements and developing use cases.

Tools and languages: Adobe FrameMaker (structured), Adobe Acrobat Pro, SnagIt, MS Office, MS Visio, MS Visual Studio (Team Explorer, Source Control, Bug Tracking), MS SharePoint, SoapUI/GroovyScript, SQL (Oracle).

Frontex – Head of Documentation and Analytics Department

October 2004 – June 2007

At Frontex (Frontier Vision Technologies, Inc.), a multinational company headquartered in the United States with offices across Europe, was promoted from Technical Writer to Sr. Technical Writer and then to Head of Documentation and Analytics Department within six months. Led a department responsible for managing project requirements, participating in project planning, developing and maintaining standards and project documentation, writing manuals, performing and documenting web statistics and competitor analyses, and developing and translating administrative documents. Completed many complex tasks personally and developed documentation templates and department workflow regulations.

Languages, tools and technologies: MS Office, MS Visio, MS Project, WebTrends, SQL, Adobe Acrobat Pro, HTML/CSS, Axure RP, SnagIt.

TopProgs – Project Manager, Head of Customer Support Department, Web Developer

August 2002 – September 2004

At TopProgs, a startup web development company, grew from web developer and customer support engineer into project manager and head of the customer support department. As project manager, led a team of developers and a designer implementing web projects and communicated with the remote employer and clients. As customer support manager, led a 24/7 customer support team of 5 employees and designed, developed, and maintained a web-based ticket system. As web developer, developed and maintained public websites, web-based applications, and a Flash chat.

Languages, tools and technologies: hand-written HTML/CSS, JavaScript, PHP, MySQL, Flash ActionScript, MS Office.

AlarIT – Web Developer

July 2002 – August 2002

At AlarIT, a large Ukrainian outsourcing company, developed a banner engine and banner management tool for one of the company's clients.

Languages, tools and technologies: hand-written HTML/CSS, PHP, Postgres.

Business Computer Service – Web Master

April 2001 – July 2002

At Business Computer Service, a small ISP, computer hardware retailer, and network integrator that also carried out custom website projects, was responsible for developing and maintaining the corporate website, dedicated websites for the company's software products, and websites for clients, as well as developing web banners.

Languages, tools and technologies: hand-written HTML/CSS, PHP, Postgres, Macromedia DreamWeaver, Macromedia Flash, Adobe Photoshop.

EOS – Web Master

September 2000 – March 2001

At EOS, a small computer hardware retailer, was responsible for developing and maintaining the corporate website.

Languages, tools and technologies: HTML, MS FrontPage, Adobe Photoshop.
